## SUMMARY

**Python Developer** with hands-on experience building machine learning models, scalable backend systems, and full-stack web applications. Proficient in Django, FastAPI, Flask, and React, with a strong foundation in API design, database architecture, and data-driven problem solving. Experienced in developing production-ready applications with clean Git workflows, modular architecture, and performance-focused design. Passionate about writing maintainable, testable code and continuously advancing toward system-level engineering expertise.

## EXPERIENCE

### Python Developer

*Prismetric*

Sep 2025 – Present

*Gandhinagar, Gujarat*

- Developed scalable backend APIs using **FastAPI and Django**, supporting full-stack web applications.
- Integrated machine learning models into production systems with structured data preprocessing and evaluation workflows.
- Designed database schemas and optimized queries to improve performance and data integrity.
- Implemented authentication, RESTful services, and clean Git-based development practices within Agile teams.

## TECHNICAL SKILLS

**Skills:** Python, MySQL, SQLite, PostgreSQL, Backend Development, RESTful API Development, Full-Stack Web Development, Machine Learning, Data Analysis, Database Design, Authentication & Authorization, API Integration, Responsive Web Design

**Frameworks:** Django, FastAPI, Flask, Node.js, Express.js, React.js, Redux, NumPy, Pandas, Matplotlib, Scikit-learn, Bootstrap, Tailwind CSS

**Cloud & MLOps Tools:** Git, GitHub, Postman, Linux (Basic), Virtual Environments, Environment Configuration, Deployment & Hosting, Agile Methodology, Version Control

## PROJECTS

### Credit Risk Analysis for Loan Approval 🔄

*(Python, scikit-learn, matplotlib)*

Feb 2026 – Feb 2026

- Analyzed in-depth customer data to uncover behavioral patterns driving credit risk using Python and scikit-learn.
- Built and evaluated predictive models (Logistic Regression, Random Forest), achieving 77% accuracy in classifying high-risk applicants.
- Applied advanced analytics and statistical modeling to support data-driven risk strategy development.
- Delivered clear visual insights to optimize understanding of customer risk and support product decisions.

### House Price Predictor 🔄

*(Python, Pandas, NumPy, Matplotlib)*

Jan 2026 – Feb 2026

- Developed a regression-based predictive model using real-world housing data to estimate property prices.
- Performed missing value handling, feature selection, and data scaling to enhance prediction reliability.
- Visualized correlations and performance metrics to interpret model behavior and identify key price-driving features.
- Followed a structured ML workflow with experimentation tracking and clean Git commits.

### ReadForge 🔄

*(Django, React.js, Redux, SQLite)*

Dec 2025 - Jan 2026

- Designed and developed a full-stack web application with authentication, session management, and relational database integration.
- Implemented CRUD operations using Django ORM to ensure efficient and secure data handling.
- Integrated React frontend with Django backend APIs for seamless user interaction.
- Maintained modular architecture and clean Git-based development practices.

### BudgetIQ – Personal Finance Management System 🔄

*(Django, React, SQLite)*

Nov 2025 - Dec 2025

- Built a budget tracking and expense management system to monitor income, spending patterns, and monthly summaries.
- Designed RESTful backend logic and integrated frontend components for dynamic data visualization.
- Implemented input validation and structured database models to ensure data accuracy and scalability.
- Focused on clean architecture and performance-oriented backend design.

## EDUCATION

**Gujarat Technological University (GTU), Ahmedabad**

*B.Tech. in Computer Engineering*

Ahmedabad, Gujarat

*Aug 2021 – May 2025*
